Lab 1a Write Up

Programming Language: Python 3

Environment: Unix
Internal Architecture:

We mainly used arrays for parsing each line of the students.txt file in order to compare search parameters.

Task Log:

Setting up github and updating computer

AJ: 1 Hour

Thomas: 1 Hour

Coding The Methods

AJ: 2 Hours (Info,Average)

Thomas:5 Hours(Student,teacher,grade,bus,query)

Testing:

During testing we found only minor bugs in parsing each line, which were quickly fixed.

Final Notes:

Program was completed over the course of 2 days.
